

Transform your patch in 2012!

Local environmental charity Groundwork Luton & Bedfordshire, helps community groups and organisations throughout the county improve their local environment, and we're looking for new people to work with in 2012!

Groundwork's current projects include:-

- creating and running a community gardening club at Downside Neighbourhood Centre, Dunstable
- designing and helping secure funding for a new wildlife garden at Stockwood Park in Luton (to be created in early 2012)
- working with businesses in Leighton Buzzard to plan and implement improvements on the Grovebury Road industrial estate
- creating growing beds at the Townsend Day Centre in Houghton Regis, and securing funding to run a horticultural therapy club
- designing, securing funding and helping implement school grounds improvements at Ferrars Junior School, Luton

Are you part of a local community group or organisation and need help transforming your outdoor space? Do you have exciting ideas and plans to better use your group's garden area, but don't know how to implement your designs?

If so, Groundwork may be able to help you. We are skilled in raising funds for project implementation and working alongside multiple partners to effect sustainable change. We can also organise volunteer events to help effect changes for a low cost (materials and provisions usually!).

Please contact us today if you would like to speak to Groundwork about how we could assist you in the future.
